SUPER INKER for A.B. DICK, RYOBI or ITEK IMPROVES INK SYSTEM

DESIGNED FOR A.B. DICK MODELS 360, 375, 9800, & 385 RYOBI MODELS 2800, & 3200

The additional distributor rolls, besides giving better milling of the ink, reverse the direction of the jumbo oscillator. This lengthens the ink train and helps to evaporate any excess water. In addition, the long steady flow of ink helps to cover starvation streaks and delivers a fine, even film of ink to the plate. The press is not altered with gadget attachments. There is no drilling or tapping for additional screws or bolts.

Installation can be accomplished by a competent operator or serviceperson. Thereafter, it can be removed and replaced by simply removing rollers.
